

THE INTELLIGENT SUPPORT SYSTEM FOR PARENTS

Senior Full Stack/React Native Developer

The transition into parenthood is tough. 1 in 3 parents are experiencing perinatal mental ill-health. Kami's vision is to empower parents with a personalised, data-driven, evidence-based coach. The value that we deliver to our users comes from the knowledge of our experts and coaches, whose intuition and experience allow them to customise support based on what they pick up from the user.

We are delivering our support through a judgment-free, artificially intelligent, digital chatbot enabling parents to:

- ❖ Get trusted, non-judgmental advice and answers to their questions;
- ❖ Set goals, monitor progress and accomplish goals for their wellbeing and parenting;
- ❖ Access teleconsultation sessions with vetted consultants specialising in fertility, parenting, wellbeing, and behaviour change;
- ❖ Find and access products and local services curated to their needs.

Applications are invited for a Senior Full Stack Developer, with a specific focus on creating a product in React Native using NodeJS which will be subsequently packaged as Android and iOS applications.

Responsibilities:

Develop, Fix and maintain our first mobile and web app (in Android and iOS)
Implement new features and enhancements
Innovate and provide critical thinking and problem-solving ability
Work with the project manager to achieve creative tech solutions

Essential Technical Skills:

6+ years experience building apps with Javascript
Experience deploying apps in the App Store and Google Play
Expert-level knowledge in React Native. You have built and deployed high-level React Native Apps before.
Expert-level knowledge in Node.js
Knowledgeable in Redux and container technologies
Knowledge of GraphQL
Knowledgeable in SQL: MySQL, Postgres, etc
Has created Apps in AWS (Amazon Web Services) - understands Amazon microservices
Has worked with video integration APIs (eg. Amazon Kinesis)
Has worked with Figma
Some knowledge in IOS SDK and Android
Has worked with Agile platforms such as Jira, Trello, Base Camp, etc.

Desirable Technical Skills:

Elixir Knowledge
Experience integrating AI solutions
Evidence of QA and Testing experience

Soft Skills:

Can communicate well in English
Responsive and able to use initiative to deliver in tight timescales

THE INTELLIGENT SUPPORT SYSTEM FOR PARENTS

Very thorough at documenting work

Versatile enough to be able to work well as part of a small and agile team

Application:

To apply forward your CV, a covering letter and contact details of two referees to jacob@kami.coach quoting reference "Kami 002" in the subject.

We are looking for someone able to start working as soon as possible.
